KEY FINDINGS:

- * US wine exports are seven times less than US imports in value terms
- * Imports are much more concentrated, with France and Italy representing 71% of total
- * The US imports wines from 79 different countries
- * It exports wine to 122 destinations
- * In 2025 wine imports in the US declined by 8.3% as compared to -33.5% of wine exports (Commercial disruption seems to be more negative for exports than for imports)
- * In absolute terms, despite the great difference in total amounts for imports and exports, decrease accounted for -\$565 M for the former and -\$428 M for the latter
- * Wine imports fell particularly in the cases of Spain, Australia, Portugal and Germany
- * Wine exports strongly decreased to Canada and China (-76.8% and -72% respectively)
- * Canada alone accounted for a drop of \$342.8 million equivalent to 80% of total fall
